SUMMARY

Informatics undergraduate focused on backend architecture and scalable system design, experienced with Laravel, Spring, and relational databases. Tech Lead of a village information system with multi-level approval workflows. JLPT N2 certified and fluent in English, with national-level Japanese-language competition achievements, enabling collaboration with international and Japanese-speaking teams.

TECHNICAL SKILLS

Languages: Java, Python, PHP, JavaScript, C

Backend & Frameworks: Laravel, Spring, RESTful API design

Frontend: React, HTML, CSS, JavaScript (native), Tailwind CSS

Databases: MySQL, PostgreSQL, Firebase

Tools & Others: Git/GitHub, Midtrans payment integration, Android Studio

EXPERIENCE

Tech Lead & Backend Lead - Capstone Project (SIDUTama) 2026

Widyatama University | Laravel, PostgreSQL

- Led the technical direction of the team as Tech Lead for a village information system for Desa Cibenda.
- Designed the application architecture, including use cases, system workflows, and the database schema.
- Served as Backend Lead and hands-on backend developer, implementing the core server-side features.

Teaching Assistant - Object-Oriented Programming (Java) 2025 - 2026

Widyatama University | On-site, Classroom

- Supervised classroom practical sessions and assisted students during hands-on Java programming exercises.
- Mentored students on object-oriented programming concepts and problem solving in Java.
- Conducted code reviews on student work and provided feedback to improve code quality.

Data Analyst Division Member - Google Developer Groups on Campus Widyatama 2025

- Mentored a 5-session Study Jam as part of the Data Analyst division.
- Prepared the basic syllabus and learning materials for all 5 sessions.

PROJECTS

SIDUTama - Village Information System (Desa Cibenda) *Laravel, React, Tailwind, PostgreSQL*

- Digitized letter requests with multi-level approvals and PDF generation; includes population data management and a public village portal.

Diary Mobile App *Java, Firebase, Android Studio*

- Android journaling app for documenting daily thoughts and photos, using Firebase as the backend.

VizClean - Data Cleaning & ML Desktop App *Python, Tkinter, Pandas*

- Desktop app for data cleaning, visualization, and supervised machine learning through a graphical interface.

Cinema Booking Web *PHP, MySQL, Midtrans, JavaScript*

- Cinema ticket booking simulation with seat selection and reservation flow, integrated with Midtrans payment gateway.

EDUCATION

Widyatama University [2023] - [2027]

Bachelor of Informatics | GPA: [3.60 / 4.00]

LANGUAGES

Indonesian: Native | **Japanese:** JLPT N2 (2024) | **English:** Fluent

ACHIEVEMENTS

- **Awardee, Japan Foundation NIHONGO Partners Counterpart Program (Summer 2026)** - 44 days, fully funded, Osaka, Japan.
